Start With A Financial Clarity Check-Up

Your bookkeeping and financial reports shouldn't leave you with more questions than answers. Whether your bookkeeping is months behind, your accounts have become difficult to manage, organizing your finances isn't your wheelhouse, or everything is technically "done" but you still don't understand what your numbers are telling you, we'll help you figure out where things stand and what's next with your money. Prosper-IST helps both individuals and small business owners turn financial information into financial clarity.

You don't have to commit to changing bookkeepers or pay for a plan just to have a conversation.

The Prosperist Financial Clarity Checkup is a short introductory review designed to help identify:

Where Your Money Is

- Where your bookkeeping currently stands
- Whether your accounts are current and reconciled
- Where your money is coming from and where it is going
- Whether clean-up is needed

What Your Numbers Mean

- What your financial information is telling you
- What is working well
- What may need attention
- Whether your financial information gives you the visibility you need

What's Next

- What your financial priorities should be
- What systems or processes may need improvement
- Plan for any big financial events coming up
- Know how Prosperist can help

And if everything looks great? We'll tell you that, too.

We believe earning your trust is more important than manufacturing a reason for you to hire us.
